**2026**

# Logo Design

The Oak Hills logo captures the full spectrum of modern development. By integrating the approachable angles of Residential spaces with the bold, ascending verticals of Commercial towers, the mark stands as a symbol of dynamic capability and comprehensive building expertise.

# Vertical Logo

The vertical (or stacked) configuration is the primary visual identifier for the Oak Hills brand. In this lockup, the structural Logo Mark sits centered above the custom Logotype. This arrangement is designed for optimal legibility in vertically constrained spaces. It should be your go-to choice for social media profile pictures, narrow signage, document headers, and mobile application interfaces.

# Background Color Usage

To maintain the premium aesthetic and strict legibility of the Oak Hills brand, it is crucial to ensure high contrast between the logo mark and its background. The logo must always stand out clearly, utilizing approved colors from the brand palette.

As a general rule, apply the full-color logo (Slate and Antique Brass) exclusively on light backgrounds, such as Ivory or Linen. When placing the logo on mid-tone or dark backgrounds, such as Mocha or Charcoal, always use the solid white (knockout) variation to guarantee maximum visibility and impact.

# Logo Misuse

The Logo Misuse section of a brand book outlines guidelines for what not to do with the brand's logo, in order to avoid misrepresenting the brand or damaging its reputation.

Do not stretch or deform the logo, modify spacing or elements

Do not change the colors, or the background, use gradients or shadows

Do not rotate or change the logo orientation
